

STATEMENT OF WORK

PAINTING OF RECYCLING TRAILERS

1. This job entails the painting of three each 18 cubic yard enclosed cardboard trailers and two each 20 cubic yard recycling trailers.
2. The cardboard trailers must be either sand blasted or sanded prior to being painted. After sanding the trailers will receive a coat of primer prior to being painted. The color will be the same color tan as what the trailers are currently. The words "CARDBOARD ONLY" will be stenciled with black paint directly below the four each openings where the cardboard is placed into the trailer. The letters will be four or five inches in height.
3. The 20 cubic yard trailers must have each of the 2 cubic yard hoppers sand blasted or sanded. They will receive a coat of primer prior to being painting. The color will be the same color tan as what the hoppers are currently.
4. With all of the hoppers removed, the bed of the trailer must be sand blasted or sanded prior to being painted. After sanding, the trailer will receive a coat of primer prior to be painted. The color will be the same color tan as what the trailer is currently painted.
5. The running boards of the 20 cubic yard trailers will be painted with a skid resistant black paint. NOTE: Sand may be incorporated into the paint.
6. The back bumper of each of the five trailers will be painted black.
7. The trailers will be delivered/towed to the contractor one-at-a-time by personnel from the Recycling Center.
8. The contractor is responsible to provide all tools, paint, primer, tape and other related supplies to complete the job.

Statement of Work – Painting Recycling Trailers (continuation)

One each 12 cu yd trailer consisting of six each 2 cu yd containers. The containers must be sand blasted, primed and painted. The color remains the same desert tan. The trailer itself also needs the same treatment. I only have one of these trailers and would need it back ASAP. A week would be a long time without it.

The 20 cu yd trailer is composed of 10 each 2 cu yd containers.
